**DRUM LIFTER TILTER**

## DRUM LIFTER & TILTER

The drum stacker has a wide range of applications, no matter any material drums, sheet metal drum, fiberboard drum, closed drum, open drum, or reinforced wall thick drum. No matter any drum materials, liquid materials such as water and lubricating oil, solid materials such as chemical raw materials and plastic particles can be transported. The two functions of transporting and dumping oil are integrated. After the fixture is used, the operation efficiency can be greatly improved and the handling cost can be reduced. Single barrel chuck, self-locking, safe and reliable: the clamp adopts parrot beak chuck designed according to the principle of mechanical linkage locking mechanism to grasp and transport the barrel load. This design not only effectively protects the edge of the tanker, but also greatly improves the safety and reliability of barrel handling. Easy to operate, improve efficiency: from the perspective of ergonomics, the fixture is a simple barrel moving machine. The operator can easily grasp and transport barreled materials without training.

- ✓ Easy to lift, transport and tilt 55gallon drum.
- ✓ Available to carry the drum to rack.
- ✓ Tilt the drum 120 for oil empty.
- ✓ Compact and reliable mechanism system to fix drum.
- ✓ It can lock a drum in vertical position to avoid spills or horizontal.
- ✓ Easily lift with pedal when unload.

MODEL		DA450
Load Capacity	kg	450
Lifting height	mm	1600
Metal drum size	mm	55 Gallon 900x580
Diameter of drum clamp	mm	600
Turning radius	mm	1200
Lifting speed	mm/time	≥20
Overall dimension	mm	1200x920x2020
Caster dimension	mm	Ø150x50
Self weight	kg	181
